SHORT-TERM INDICATORS<sup>1</sup>

January 2025

## STATISTICS PORTUGAL PRESENTS A NEW EDITION OF THE SHORT-TERM INDICATORS TO MONITOR THE PORTUGUESE ECONOMY

Starting this month, Statistics Portugal will publish the Monthly Short-term Indicators, a new monthly highlight that replaces the previous Monthly Economic Survey.

The renewal aims to maintain the regular updating of the main economic indicators in a more accessible and documented format.

The new publication gathers key data on the Portuguese economy, organized into seven major areas:

- External Framework
- Economic Activity
- Private Consumption
- Investment
- External Demand
- Labour Market
- Prices.

The press release is accompanied by the main statistical tables, with hyperlinks, whenever possible, to the indicators available in the database and the corresponding methodological note.

With this new approach, Statistics Portugal reinforces its commitment to transparency and accessibility of information, ensuring that users continue to closely monitor the evolution of the national economy.

<sup>1</sup> Information available until 18 February 2025.
