

# SÍNTESE INE @ COVID-19

06 . August . 2021

Statistics Portugal makes available the weekly report for monitoring the social and economic impact of the COVID-19 pandemic.

This report covers the press release concerning:

- Industrial production index – June 2021, published on 2 August.

For further details, see the link available at the end of this press release.

## The year-on-year rate of change concerning industrial production was 10.4%

In June, the Industrial Production Index (IPI) registered an year-on-year rate of change of 10.4% (26.6% in the previous month). Excluding *Energy*, this rate of change was 9.7% (28.5% in May).

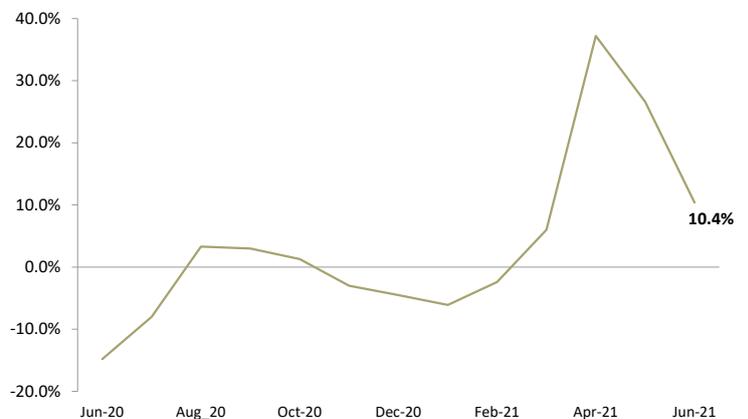

The rate of change in the *Manufacturing industry* stood at 10.3% (31.4% in the previous month).

These results continue to be influenced by a base effect, as the comparison focuses on months affected by the pandemic (in June 2020, there was a year-on-year decrease of 14.8%).

Comparing June 2021 with June 2019, the IPI recorded:

- A year-on-year reduction of 5.9 percentage points;
- A month-on-month rate of change of -2.5% (-4.8% in the previous month).

The series “INE@COVID-19 Synthesis” began in April 2020, with the purpose of making available an aggregation of some of the most relevant official statistical findings released each week, taking into account the pandemic situation that was then declared in Portugal.

This series of Press Releases has now completed one year of publication, with separate versions in Portuguese and English. Statistics Portugal intends to continue to contribute this way to the monitoring of the social and economic impact of the COVID-19 pandemic by decision makers in public and private bodies and also by the general public.

The same intention also led to the creation of the “Special INE COVID-19” area in Statistics Portugal’s portal, which also includes other aggregated contents under the same theme.
